Splash						P				X	X	X	X	X		X	X	X	X			X		X		X		X	X	X		X	X					P				X					

“A world of flowers, plants and a whole lot more.”

Pollination Notes

Japanese and European varieties of plum do not cross pollinate with each other. European varieties have been known to be self-fertile, which includes Blue Damson, Brooks, French, Green Gage, Imperial Epineuse, Italian, Mirabelle de Metz, Seneca, Stanley, and Yellow Egg. Nadia is a newer variety of Japanese plum/cherry hybrid which seems to be self-fertile but will also do well with a Japanese plum pollinator.

Sour Persian Green plums are considered self-fertile.

Directions for use of chart:

- 1. From the left-hand column select a cultivar you are interested in growing.
- 2. Check across the chart. The unmarked boxes will be a reliable pollinizer for the chosen cultivar.

P = Recommended Pollinator
