

Bulk / Bagged Potting Soil

Flower World's Potting Soil (RTU - Ready to Use)

Bulk or Bagged

Composted manure, pumice, slow release fertilizer, and amendments. Use for general planting. This is the most popular potting soil.

Flower World's Compost

Bulk or Bagged

Mixture of composted plants and manure. Good for mulching and mixing with existing soil.

Flower World's Garden Soil/Topsoil

Bulk Only

Composted plant material which includes composted leaves, plants and grass clippings. Good for mulching, topsoil and mixing with existing soil.

Flower World's Indoor Potting Soil

Bagged only

Composted manure, slow release fertilizer, amendments and extra pumice for added drainage. Use for most types of indoor plants.

Strongly Acid Potting Soil (pH 4.5 - 5.5)

Blue Printed Bag

Use this special soil for Azaleas, Rhododendrons, Heathers, Blueberries and certain other plants requiring strongly acid soil. This is our own potting mix which we use every day for these plants requiring strongly acid soils. It is fortified with slow release fertilizer. No need to feed for 2 - 3 months depending on temperature and size of plants.

Acid Potting Soil (pH 6.2 - 6.7)

Red Printed Bag

Petunias, Ivy Geraniums and many perennial plants will perform better in this soil. This is our own potting mix which we use every day for these plants requiring slightly acid soils. It is fortified with slow release fertilizer. No need to feed for 2 - 3 months depending on temperature and size of plants.
