

## Rabbit Resistant Plants

Rabbits will gnaw on new, tender growth of a large variety of annuals, perennials and ornamental shrubs. They can also do considerable damage to trees and shrubs, preferring to gnaw on the smooth bark of younger specimens. Rabbits can damage trees and shrubs even in winter months.

Rabbits tend to avoid plants with strong fragrance and fuzzy textures. Although no plant is truly rabbit proof, the following is a list of plants that rabbits tend to avoid.

### Annuals

Calendula	Lobelia	Nicotiana	Stock
Lantana	Marigold	Snapdragon	

### Groundcover

Ajuga spp. (Shade)	Fragaria spp	Gaultheria spp. (Shade)	
Arctostaphylos uva-ursi.	Galium odoratum	Rubus spp.	

### Herbs

Allium	Melissa officinalis	Rosmarinus officinalis	Teucrium chamaedrys
Hyssopus officinalis	Mentha spp.	Salvia officinalis	Thymus spp.
Lavandula spp.	Origanum vulgare	Santolina spp.	

### Ornamental Grasses

Liriope (Shade)	Ophiopogon (Shade)		
-----------------	--------------------	--	--

### Perennials / Bulbs

Achillea spp.	Bergenia spp. (Shade)	Digitalis	Kniphofia spp.
Alchemilla mollis	Campanula spp.	Epimedium spp. (Shade)	Linum
Aquilegia spp.	Chrysanthemum spp.	Euphorbia spp.	Lychnis coronaria
Asarum	Cerastium	Ferns	Penstemon spp.
Asclepias tuberosa	Cimicifuga (Shade)	Gaillardia spp.	Phygelius
Astilbe spp.	Coreopsis spp.	Geranium spp.	Sedum spp
Acanthus spp.	Cyclamen spp. (Hardy, Shade)	Helleborus spp. (Shade)	Sisyrinchium spp.
Anemone spp.	Delphinium	Hemerocallis spp.	Stachys byzantine
Artemesia	Dicentra spp.	Heuchera spp.	Viola spp.

### Shrubs

Ceanothus gloriosus	Erica spp.	Mahonia (Shade)	
Cotoneaster spp.	Lonicera spp.
